

CUTTING EDGE PRECISION, POWERING THE FUTURE.

With CAD-to-Cut capabilities, we seamlessly translate design specifications into precise cuts.

With our Laser Cell Center, you can trust in our comprehensive and efficient solutions for precision cutting.

About The Laser Cell Center

The Laser Cell Center provides customers with cutting-edge equipment including CO₂, fiber optics, and YAG lasers providing versatile options for different applications.

Accuracy, Tolerance, & Repeatability

MARKETS

- Flex PCB Laser Processing
- Rigid Flex Laser Processing
- Laser Micromachining
- Aerospace
- Automatic Applications
- Board Level Shields
- Defense
- E-Mobility
- Fuel Cell
- Medical

APPLICATIONS

- Blind Via Drilling (BHV)
- Through via drilling (THV)
- Routing
- Skiving
- Coverlay Routing

VALUE ADD PROCESS

- Etch/Laser Combination
- Auto Excise & Auto Form
- E-Test
- Forming
- Paint
- Plating

MATERIALS

- Adhesiveless copper-clad polyimide laminates
- Copper-clad polyimide laminates with adhesive
- Coverlay (Polyimide + Adhesive)
- Ferrous
- Precious Metals
- Glass reinforced laminates (e.g. FR-4, BT, RT Duroid)
- Liquid Crystal Polymer (LCP)
- Polyimide
- Plated, Reflective & Refractive Metals

INNOVATING A BETTER WORLD, ONE PART AT A TIME.
